

TOOL 6

My School is the Planet

Title : My School is the Planet

Developed by : Quercus

Topics : Sustainability and climate change

Website : quercus.pt/projeto-a-minha-escola-e-o-planeta/

Description

"My School is the Planet" is an environmental education project aiming to instil human values, habits, and behaviours that actively support environmental goals. Through a pedagogical and playful approach, it leverages digital platforms for the dissemination of content. The project consists of an environmental education programme aimed at students, which promotes behavioural change through music.

Duration

not specified

Resources needed

At least one technological device, such as a computer or tablet, in order to be able to access the resources.

Age

5 to 11 years old

Expected outcomes

It is anticipated that this tool engages the class while conveying crucial messages, fostering active learning among students. Designed to help young people internalize ethical values, it fosters the development of environmentally responsible future citizens.

Climate change

The urgency for behavioural change resonates throughout both the story and the songs.

TOOL 6

My School is the Planet

Risk prevention

The project contributes to risk prevention by equipping students with the knowledge and skills necessary to address environmental challenges. Through its innovative methodologies, it fosters environmentally conscious students capable of mitigating risks and contributing to sustainable development.

Management

To maximize effectiveness, the tool benefits from the guidance of an educator or professional who can utilize the resources to facilitate discussions and foster a positive classroom environment.

Others

Relevance to CRISEPAC Objectives

The tool aligns with CRISEPAC objectives by promoting sustainability and fostering risk prevention in a classroom setting.

Possible adaptations

It serves as a relevant and interactive tool for educators to initiate discussions about climatic events.

Weaknesses

While it does not explicitly focus on disaster risks, it touches upon prevention measures, as well as climate change.

Strengths

The project employs music and storytelling to convey messages and promote engagement and active learning.

Methodologies

The project provides a comprehensive story, which addresses topics such as nature protection, ecosystem preservation, and the conservation of natural and historical-cultural heritage.

It features 11 songs with easily understandable lyrics, which are included in the available e-books. Additionally, games and activities are designed to enliven classroom sessions, with the songs serving as key educational resources.
