

Civil Defence

Title : Civil Defence | *Developed by* : Ministry of Education of the Republic of Latvia

Topics : Emergency situations | *Website* : <https://registri.visc.gov.lv/>

Description

The purpose of the methodological material is to ensure the acquiring of the "Civil Defense" training course in secondary and professional education institutions, creating a set of knowledge, skills and attitudes about everyday possible dangerous situations, principles of safe behaviour, as well as disasters that can take place with special attention to emergency response.

Duration

Differs depending on chosen format

Resources needed

To use the materials we need:

- Computer
- Internet connection
- Optional - printed PDF tools

Age

High School: 14 to 19 years old

Relevance to CRISEPAC Objectives

The material is relevant to the CRISEPAC project because it contains practical suggestions on how to act in critical situations, and helps to understand variety of disasters.

Expected outcomes

By completing the course learners will be able to understand:

- Possible types of disasters and their consequences;
- Actions in case of various threats, emergency situations and disasters.

Civil Defence

Management

Civil defence issues can be included both in separate lessons, as well as integrated into other subjects. Practical tasks and topics of discussion can be chosen according to the situation of the local community.

Risk prevention

The tool contributes to risk prevention by equipping children and families with the information and tools they need to ensure safety and be prepared in the action in case of various threats and disasters.

Others

Weaknesses

Some of the topics are difficult to include in a sequential and successive daily learning process.

Strengths

Well designed material with lesson plans and descriptions - ready to use in schools.

Possible adaptations

Material can be translated and adapted with realities in project partner countries.

Climate change

Some resources provided by the tool contribute to environmental awareness and education, which are essential components in addressing climate change. The educational materials available incorporate topics related to climate change.

Civil Defence Methodologies

Methodological material has been developed as a sequential learning process using various methods - lectures, presentations, video materials, group work, pair work, individual work, discussion.
